Timber Windows & Doors Manufacturer

sliding sash • flush casement • stormproof • french doors • bi-fold doors • sliding doors • entrance doors

We have been in the market since 1999 and have come a long way during that time. We have developed from a small carpentry business into a thriving business selling products on the Polish market and abroad.

It's hard to believe but it's been 10 years since we started our partnership with Great Britain in 2006. During this time we've experienced hard work and great adventures, and have appreciated learning about your culture and architecture. This knowledge enables us to offer you the products you really want with every small detail considered and refined.

It is not enough for us to provide you with the best products. We want you to feel confident and safe when you buy our windows and doors. Our priority is good communication combined with open and transparent methods of working with you.

Often you, our clients, will present us with ambitious ideas and visions- we are always flexible and open to new challenges.

We enjoy discussing options with you, so we can find solutions together. Each new project is a new adventure for us.

We often visit Great Britain- however if you would like to visit us, a one- day visit is easily achievable. You can get to know us personally, and gain first-hand knowledge of our products and the production process.

We look forward to working with you in the future!

EXPERIENCE

11 YEARS
IN THE BRITISH MARKET

Sliding Sash Windows

Our Sliding Sash Windows are the product of the beautiful of timber combined with a rich experience and tradition that faithfully reproduces the charm and character of traditional English sash windows. The windows are made to order by craftsmen who will match the design of your existing windows exactly to add value to your property.

Our range includes traditional weights and cords systems, spring balance systems with double or triple glazed sealed units. There is also an option to have a 150 mm sash box.

An inexpensive way to add value and the beauty to the windows are mouldings and architraves. They are made to measure and available in a range of styles and wood types, including pine, oak and meranti.

Technical specification:

Softwood, hardwood or oak • multi-layer timber sections • hung on traditional weights • smooth running cords and pulleys • fully drained and vented • internally beaded for security • factory glazed with argon gas filled sealed units with warm edge spacer bars • factory finished with preservative, primer and two coats of micro-porous paint by Remmers • sash box 170 mm • 58 mm window sash • 46 mm meeting rail.

Flush Casement Windows

When you look at our Flush Casement windows you see simplicity, elegance and excellent quality. We make our windows from the same quality materials and to the same high specification as all the English market leaders. Our Flush Casements come with friction hinges and multi point secure locking system to openings sashes. Air circulation is ensured with ventilation grooves and energy efficient glazing supplied as a standard.

You can also add a touch of modernity to our traditional Flush Casements and have them with aluminum clad.

Our offer includes also the lipped stormproof windows with double gasket as a standard.

An inexpensive way to add value and the beauty to the windows are mouldings and architraves. They are made to measure and available in a range of styles and wood types, including pine, oak and meranti.

Technical specification:

Factory applied micro-porous coatings by eco-friendly Remmers/ Teknos company provide maximum protection • Double glazed units 4/16/4, "thermo-float", internal glass with a low-e value reflects heat back into the room, the cavity filled with argon gas, $U_g=1,1 \text{ W/m}^2\text{K}$ • Warm edge spacer bar helps to minimize heat loss and combat condensation levels on the internal pane • 58 mm window sash • Weather seal DEVENTER- guarantees your window system reliable heat and sound insulation • Multi-layer timber sections prevent warping and combats twisting • 90 mm window frame.

French Doors

The French Door system can be used as an exit from the kitchen, bedroom or living room to the garden or balcony. Our French Doors offer a charming, alluring addition to your home or conservatory. All doors are available in a variety of colours and come with a choice of design to suit your requirements.

All our French Doors are internally beaded to prevent removal of the glass from the outside, fitted with toughened glass and fully adjustable 3D Nico hinges.

An inexpensive way to add value and the beauty to the windows are mouldings and architraves. They are made to measure and available in a range of styles and wood types, including pine, oak and meranti.

Technical specification:

Softwood, hardwood, oak • Multi-layer timber section • Internally beaded for security • Multi point locking system FUHR • Aluminum threshold- EXITEX • NICO 3D fully adjustable hinges in three positions • Double glazed units 4/16/4, "thermofloat", internal glass with a low-e value reflects heat back into the room, the cavity filled with argon gas, $U_g = 1,1 \text{ W/m}^2\text{K}$ • toughened glass as a standard • Factory finished with preservative, primer and two coats of micro-porous paint by Remmers/TEKNOS.

Bi-Fold

Our Bi-fold system is the ideal solution for rooms requiring a lot of sunlight, or for homes situated in scenic areas where having large glass windows enables you to enjoy a complete view of the landscape, moreover, they offer maximum accessibility to the outside

The Bi-fold door system includes Brio or Centor complete hardware available in a choice of premium finishes. There are also various opening options available to suit customer's individual needs and the design of the room.

Technical specification:

Softwood, hardwood, oak • Multi-layer timber section • Internally beaded for security • BRIO or CENTOR hardware • Double glazed units 4/16/4, "thermo-float", internal glass with a low-e value reflects heat back into the room, the cavity filled with argon gas, $U_g = 1,1 \text{ W/m}^2\text{K}$ • Toughened glass as a standard

- Factory finished with preservative, primer and two coats of micro-porous paint by Remmers/Teknos.

Sliding Door System/ Patio Doors

The great flexibility of our Sliding Door System enables you to close very wide openings by installing multiple lift-and-slide doors. Our hardware supplier offers the ideal solution: a simple movement of the handle, and the door slides lightly and silently.

The Sliding Door System provides an ideal solution where large areas of glass are desired to provide almost uninterrupted views whilst maintaining the ability for wide areas to be opened to the outside. This option is also available with aluminium cladding and triple glazing.

Technical specification:

Softwood, hardwood, oak • Multi-layer timber section • Internally beaded for security • AGB or MACO hardware • Double glazed units 4/16/4, "thermofloat", internal glass with a low-e value reflects heat back into the room, the cavity filled with argon gas, $U_g = 1,1 \text{ W/m}^2\text{K}$ • Toughened glass as a standard • Factory finished with preservative, primer and two coats of micro-porous paint by Remmers/Teknos.

Traditional Entrance Door

We believe that each door should be a reflection of the homeowner's unique taste and personality. Quality has always been uppermost in our manufacturing goals. Our timber doors can be made for any style of home, bespoke joinery doesn't always mean traditional in style, just traditional and reliable in construction.

Our wide range of Traditional Entrance Doors includes glazed and panelled options. The Traditional Entrance Doors are constructed with the solid timber, high security, multi-point locking system FUHR and fully adjustable Nico 3D hinges as standard. The doors are available with optional side and top lights; in a wide variety of configuration, inwards and outwards opening, single or double door leaf as well as split stable door option.

We manufacture a wide range of doors, from bespoke to the wide range of door designs which are available on our website.

Technical specification:
