We invite you for the new front doors catalogue

We introduce you the new catalogue of front doors!

It has been over 21 years since our company produced the first door. A lot has changed with us. We are constantly developing, implementing the new technologies, gaining new markets.

However, we still stick to our values and principles, like: honesty, full commitment to the work performed, responsibility and respect for tradition, to which we are consistently faithful from the very start.

Our love for wood, as well as admiration for its smell and beautiful texture, hasn't changed either. We are very lucky because we do what we love, and only then it can be done even better.

We invite you to visit our catalogue!

Safety

Regardless of the style, each of our doors is equipped with a 5-point class RC-3 locking system by the German FUHR company, solid MACO hinges adjustable in three planes and toughened glass. At your request, we can use the WINKHAUS AV2 Heritage Lock (automatic locking system with steel hooks) and the WINKHAUS cylinder in various anti burglary classes.

Design

We offer you traditional (Victorian, Georgian, Edwardian, 1920's/ 1030's) and modern English doors. We produce stable-doors as well. Ornamental and sandblasted panes, stained glass, traditional fittings, door knobs, knockers or letter boxes, will gave them unique character. Every colour is available.

OUR OFFER

22
YEARS OF EXPERIENCE

15
YEARS ON THE BRITISH MARKET

Durability and functionality

We pay special attention to selection of the best materials and the production process itself. We want to be sure that you will receive the product of the highest quality. The use and maintenance manual guide is available on our website.
Following our recommendations guarantees that the door will function perfectly and look new for a very long time.
Our traditional English door have been tested in a notified European laboratory in accordance with applicable regulations on construction carpentry and can be marked with CE sign.

CONSTRUCTION

Traditional front door

- hardwood-frame thickness: 90mm,
- leaf thickness: 58mm,
- timber panels with thermal insulation

Modern, constantly developed technological line enables the implementation of projects for the most demanding Polish and foreign customers.

We have a modern, technologically advanced machinery, which we are gradually modernising and supplementing with new items. As a result, we are expanding our production capabilities and increasing the efficiency and accuracy of machining.

All processes are subject to careful control.
