

EVO SASH WINDOW

Technological evolution of traditional window construction

Here we present the "EVO sash window" - a novelty in our offer and on the English market. We offer a completely new structure that combines the traditional appearance of the sliding sash window and the advantages of tilt & turn window opening inwards.

STANDARD EQUIPMENT

CONSTRUCTION	box thickness: 170mm
OPENING TYPES	top sash fixed (49mm) bottom sash tilt & turn (78mm)
HARDWARE SYSTEM	MACO MULTI MATIC tilt & turn window hardware microventilation, mishandling device
GLAZING	triple glazing unit 44mm • $U_g=0,6 \text{ W/m}^2\text{K}$ • warm edge TGI
SURFACE COATING	micro porous paint or stain coating system, 4-coat painting system
WEATHERSEALS	two weatherseals
HORNS	external decorative horns (2 options)
THRESHOLD	56 mm thick hardwood threshold

Optional equipment:

- **HARDWARE:** higher security level • "tilt first" fittings protecting from uncontrolled opening of the sashes by children and unauthorized persons • concealed hinges • handle with a key
- **GLAZING:** soundproof glass • toughened glass • laminated glass • ornaments.
- **CONSTRUCTION:** extended threshold • cills • widening of the jambs.
- **OTHER OPTIONS/ADDITIONAL ELEMENTS:** various types and widths of glazing bars • horns • trickle vents • internal timber window boards.

The main advantages are:

- maintaining the traditional appearance of "sash" windows while improving wind- and water-tightness parameters,
- significant improvement of thermal insulation thanks to an energy-saving, triple glazing unit,
- easy-to-use sash with a handle,
- many possibilities of modifying the glass in the set (soundproof, anti-burglary, toughened glass),
- circumferential fittings ensuring perfect clamping of the sash to the frame along the entire perimeter,
- a large range of optional equipment regarding windows and fittings,
- visual consistency with our other products dedicated for the English market,
- the same shapes of bars.
